

MOONLIGHT MEETING.

Since the storm, the weather has been most clearing, and the moonlight nights lovely.

Don't fail to buy and send home a copy of the Guide Book. Letters come by every mail calling for it.

The Microscopical and Natural History Society will hold a meeting to-morrow morning at eleven o'clock at Alhambra House.

Five—Yesterday afternoon a grass house near Smith's Bridge was burned to the ground. Cause a match dropped in the straw by an old woman after lighting her pipe.

Auction Sale.—Mr. Adams calls to day a choice assortment of China goods recently arrived by the Taffarite. Read the advertisement and go and improve the opportunity.

Fixed.—In the Supreme Court, in the case of C. Kamao—murderer in the 2nd degree, the jury rendered a verdict of guilty, and the prisoner was yesterday sent to prison.

Prize Meeting.—The Lyceum will be held on Sunday afternoon, and there was a manifestation of deep interest. President Pratt of Oahu College led the meeting.

There was another smash-up on Monday of a native express, but as usual nobody was hurt. These accidents are becoming very common, and somebody's purse must suffer.

At a meeting of the Board of Education on Wednesday last, Mr. Hill, principal of the Union School at Lahaina, was appointed principal of Kalaheo Reformatory School in this city.

The Fountain Restaurant and boarding house has been removed to Hotel street, three doors west of Fort street. Teed said water on land, said hours. R. C. Kibby, Proprietor.

Attempted Suicide.—A brain-crazed Oriental in Kapalama made an attempt last week to sever the throat of his wife by cutting his own throat, but did not do more than sever his windpipe, for which he is now under treatment at the hospital.

The individual who has been committing so many depredations in the private dwellings, was captured last week under a bed by a Chinese cook, and has been sent over for one year, under four indictments.

Mons. M. Ballen, French Consul and Commissioner, took passage in the Kilauea yesterday, for Lahaina, where he will spend a month with his family. During his absence Mr. Perat is entrusted with the affairs of the consulate.

The Grenada was advertised to leave San Francisco Wednesday, January 5. The Colima was 8 days and 10 hours on the passage down, and the Grenada will probably be about the same time. It so, she will be due Thursday afternoon or evening.

The boat that can't be beat, can be seen in the Book store. It is a sample of forty tons raised from the bottom of the harbor, and was brought down by Capt. Gray of the Mary Bell Roberts. It is 21 inches in length, two feet and a half in circumference, and weighs twenty-three pounds.

A union meeting will be held at Kawaiaho church this evening at 7 o'clock, which promises to be interesting. It will be open to all, both natives and foreigners, prayers and remarks will be limited to three minutes, and we trust there will be a large and enthusiastic assembly convened.

Steamer Kilauea had a very rough passage around Hawaii last week. She left here just after the northeast gale and found the sea rough and heavy surf at most of the landings. The schooner Kilauea had been at anchor for three days, detained unable to load on account of the heavy surf. The Kilauea sailed yesterday for Kona, and will be back Saturday afternoon.

Dawson AHEAD.—The Daily Bulletin of December 24th, gives the full text of Judge Wheeler's decision, by which the San Francisco Presbytery is permanently enjoined from investigating the Dawson Case, on the ground that he had tendered his resignation while a member in good standing, which was accepted, consequently the Presbytery has no further control over him.

No Mail AHEAD.—It is annoying to have regular packets arrive from San Francisco, in the interim between the steamer and bring no mail. And not only annoying, but it is a draw back to the business of the port. Bark Mary Bell Roberts left San Francisco on the 25th of December, eleven days ahead of the steamer's regular day of departure, which was Jan. 5.—and yet the bark brought no mail from the States. She arrived here after a fair passage for December, less than 41 days, and at least six days ahead of the mail steamer, but was allowed to bring no letter or newspaper mail from the San Francisco post office. Every packet sailing at least 7 days ahead of the mail steamer, should bring a mail from the post office. The average passage is about 15 days.

The Union Christian Worker.—We have recently received from our willing fellow-townsmen Charles E. Clark Esq., the first number of volume I of a newly started paper, bearing the above title, of which he is one of the editors. It is a monthly, intended for families and Sunday schools, and judging from the specimen copy before us, will be high-toned and wide awake. Each number will contain international Sunday-school lessons for the month, prepared by a number of California clergymen of different denominations. We would encourage it to the consideration of Sunday-school superintendents and teachers in this country. The paper is very handsomely printed on tinted paper by C. G. & Co., 414 Market street, San Francisco, to whom orders may be addressed.

Fixed.—Mr. S. M. Kamao, the historian, who is a candidate for the Legislative Assembly lately published in Hawaiian and also in English, in the Kukua and Advertiser, an electioneering address, which was virtually an attack on the Supreme Court. On Thursday he was summoned before the court to answer the charge of contempt of court. Colonel Jones made an apology to the court in behalf of Kamao, for the offensive publication, and said that it conveyed more than was intended to be said. Judge Harris then gave the accused a stern lecture, which applied also to publishers of papers, and imposed on him a fine of ten dollars. This practice of issuing electioneering addresses has been carried too far, and some of them, in years past, have contained falsehoods, which the candidates know to be such, but hoped to gain some advantage by publishing.

Rain Records.—We appended a table showing the rainfall in this city for the year 1915, for which we are indebted to W. W. Hall Esq. The rainfall for 1915 is also added for purposes of comparison.

It will be seen that the rainfall during 1915 was pretty evenly distributed throughout the year, with the exception of the month of July, when there was an inch fall. In July, 1914, nearly three times the amount fell in the same month in 1915.

The Flag Ship.—The new schooner lately built by Messrs. Foster & Co. is now finished and will leave this afternoon on her trial trip to Lahaina. She has been named the Nettie Merrill, the old vessel of this name, which is now owned by the Messrs. Foster, and will run regularly to Kona and Maui. Messrs. Kanael, having received the name of Manios, will run to Kona and Maui.

The new schooner presents a fine appearance, and, if we are not mistaken, will show some fine sailing qualities. She measures 154 tons, and is therefore larger than the Mot, and the largest vessel ever built here. Her sails are large and roomy, and she has fitted up in fine style for the comfort of travelers. Captain Kane, who has been so long and favorably known on this route will command the new Nettie Merrill, and jointly merits the title of Commodore, his craft being now the flag ship of the Hawaiian-built coasters. We congratulate the owners, Messrs. Campbell and Burton, on the possession of a yacht of this class, and the builders who justly feel proud of their work.

Providence, H. I., December 26th.—The trotting stallion *Black Hawk*, formerly of Serrano farm, purchased by Governor Serrano, and taken to the island, died yesterday.

Providence, H. I., December 26th.—The trotting stallion *Black Hawk*, formerly of Serrano farm, purchased by Governor Serrano, and taken to the island, died yesterday.
